INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2004/002531

		No. III Non-establishment o licability	f opi	nion with regard to novelty, inventive step and industrial		
۱.	The	ne questions whether the claimed invention appears to be novel, to involve an inventive step (to be non- ovious), or to be industrially applicable have not been examined in respect of:				
		the entire international application,				
	\boxtimes	claims Nos. 31				
		because:				
		the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):				
		the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):				
		the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.				
	×	no international search report has been established for the said claims Nos. 31				
		the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:				
		the written form		has not been furnished		
				does not comply with the standard		
		the computer readable form		has not been furnished		
				does not comply with the standard		
		the tables related to the nucleo not comply with the technical re	tide a equir	and/or amino acid sequence listing, if in computer readable form only, do ements provided for in Annex C-bis of the Administrative Instructions.		
		See separate sheet for further	detai	ls		

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2004/002531

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Yes: Claims

1-30

No: Claims

Inventive step (IS)

Yes: Claims

1-30

No: Claims

Industrial applicability (IA)

Yes: Claims

1-30

No: Claims

2. Citations and explanations (Rule 70.7):

 Certain published documents (Rule 70.10) and /or

2. Non-written disclosures (Rule 70.9)

see separate sheet

Re Item III.

Rule 39.1(iv) PCT - Method for treatment of the human or animal body by surgery

Re Item V.

- 1 The following document is referred to in this communication:
 - D1: US 2002/193801 A1 (MARCHIONE ANDREAS ET AL) 19 December 2002 (2002-12-19)
- Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parenthesis applying to this document) a guide wire location means (fig. 8) for locating, in use, a guide wire at an axis of a neck of a patient's femur comprising:
 - a base part (1) for securement to a head of the femur;
 - a part securable (3) to the base part and adjustable relative thereto;
 - a part (6) for directly or indirectly receiving a wire guide, said wire guide receiving part being securable to said adjustable part (fig. 10); and
 - sighting means including a probe (13) having a part engagable with the head or neck of the femur.

From this, the subject-matter of independent claim 1 differs in that the part securable to the base part is spherically adjustable relative thereto.

- 2.1 The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)

 The problem to be solved by the present invention may be regarded as improving the adjustment movement of the guide wire location means.
- 2.2 The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

In the guide wire location means according to document D1, a first inclination of the wire receiving part is possible and then the wire receiving part can be translated to position the guide in front of the bone insertion point. With the spherically adjustable movement, the adjustment of the angle of the

International application No.

PCT/GB2004/002531

guide does not modify (like the tilting movement in D1 does) the position of the entry point in the bone and therefore no translation is needed.

2.3 Claims 2-30 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
